

I respectfully urge you, the FCC, to REJECT the NAB's petition 04-160 and support XM's ability to provide me with the programming I deserve, as a paying customer.

I am a huge music fan and have found XM to be a breath of fresh air in this nation of FM stations playing the same songs over and over again. I pay a subscription fee so I do not have to listen to what record companies have paid to be played.

Competition is healthy and needed to prod the incumbent to provide better service than is in effect. Local service should be allowed. If local stations provide better service than XM, then they should have nothing to worry about.

Thank you.

Sincerely,
Denver DeSeranno
